Project Name : Serviio

Main Idea :

Beyond simply connecting people to service providers, the platform is designed as a comprehensive, real-time management system with several key functionalities:

- **Real-Time & Location-Based Discovery:** The app uses live GPS and smart distance filtering to help users instantly locate technicians who are nearby.
- **Flexible & Urgent Booking Options:** Users can make instant bookings or schedule future appointments. For urgent breakdowns—like electrical sparks, AC issues, or pipe bursts—there is an "Emergency Fix" feature designed to provide service within 30 to 45 minutes.
- **Safety and Trust Systems:** The platform heavily emphasizes security through an advanced verification system that includes ID and police verification forms, a 4-digit technician verification code, and an SOS panic button. It also tracks behavior and maintains service quality through detailed ratings and reviews.
- **Streamlined Communication & Rebooking:** Customers and providers can talk directly using in-app messaging and calling. To make future repairs easier, users can bookmark their favorite technicians and use a "One-Click Repeat Booking" feature to hire them again without searching.
- **Multi-User Ecosystem:** The use case diagram shows that the platform is built to handle different types of users—Customers, Admins, Service Providers, and even Job Seekers who can search and apply for work—all while processing secure billing through a payment gateway.

Motivation :

1. The idea originated from personal challenges the creator faced when trying to get basic services after moving to Dhaka and renting a house.
2. Specifically, they experienced issues like an unavailable electrician, needing a plumber to fix a washroom, and wanting to paint walls.
3. The overarching difficulty in finding reliable professionals to handle these everyday problems directly inspired the creation of the Serviio platform.

Team Members :

- 1) Jahin Nowaz Sharoj - 0112230482
- 2) Md. Mahfujur Rahman - 0112230483
- 3) Md.Sahriar Hossain - 0112230969
